PROFESSIONAL SUMMARY

UI-UX Developer/Front-End Developer and UI/UX Designer with **2 years of experience** building responsive web applications and systems using modern front-end technologies. Skilled in designing and building scalable, user-centered interfaces from wireframes to production.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript, PHP Fundamentals, React, TypeScript, Tailwind CSS, Sass, Material UI, Hero UI, Redux, RTK Query, Axios, API Integration

UI/UX Design: Figma, Low and High-Fidelity Designs, Mockup and Wireframing, Prototyping, Design Systems, Design Flowcharts

CMS & Tools: WordPress, WordPress Plugins, Git, Azure, VS Code, Postman

Design Tools: Figma, Adobe Illustrator, Affinity Designer, Canva

WORK EXPERIENCE

Junior UI/UX Developer / Front-End Developer
Asialink Finance Corporation

Dec 2024 – Present

- Lead Designer and front-end developer of ROPAHUB, a web system that streamlines COLLECTION, ROPA and Legal workflows for loan collateral processing and management.
- Integrated backend APIs for operations using Redux for state management and Redux Toolkit Query for handling API requests.
- Handled development and design of *User Management*, *Report Generation* and *System Configuration* modules of a Warehouse Monitoring System, which monitors the collaterals statuses when transferred-in and transferred out from warehouses, improving the overall user experience in handling user accounts, account policies management and generation of structured reports.
- Developed a revamped login module of WMS from basic login authentication to JWT-Based Authentication with MFA.
- Collaborated with Front End Developers and Back End Developers to build a *Lead Engagement and Conversion System*, a system that processes lead engagement, facilitate lead conversion and produce successful onboarding.
- Handled the front-end development and overall design of LECS's *Report Management*, *Scope Management* and *Sign Web Application*.
- Designed wireframes, mockups, interactive prototypes, system flowcharts, and low- to high-fidelity user interfaces using Figma, effectively communicating system functionality and translating project requirements into clear, user-centered designs for seamless project handoff and development.
- Supported system administrators in resolving user-reported issues and tickets, ensuring timely issue resolution and minimizing system downtime.

WordPress Developer (Freelance)
Mori Tech

Sept 2025

- Translated Figma designs into fully functional websites created using WordPress CMS, custom WordPress PHP page templates, WordPress plugins such as Advance Custom Fields (ACF) and CF7 for dynamic content generation.
- Implemented custom designs, themes, and post types to meet specific website requirements, enhance functionality, and deliver a more intuitive and engaging user experience.
- Improved the SEO optimization of WordPress websites and websites responsiveness across multiple devices, achieving an average ranking of 97–100% based on Google PageSpeed Insights.

Information Developer
Asialink Finance Corporation

Oct 2024 – Nov 2024

- Developed user manuals and system release notes for web application systems, translating complex technical concepts into clear, user-friendly documentation and enhancing users' understanding of system products.

- Created User Manuals includes a Sophisticated Financing and Account System, that handles loan processes such as loan computations, and a Payment Center Management System, used for posting payments recorded from the different Sophisticated Financing and Account System.
- Conducted a manual system Quality Assurance testing to assist the QA Engineers for system testing and system errors identification, improving the total usability of system products.

KEY PROJECTS

Lead Engagement and Conversion System (LECS)

Tools: React, TypeScript, Material UI, Redux, RTK Query, API Integration

- Contributed to the development and the design of a Lead Engagement and Conversion System), focusing on the Reports Module, Scope Management, and Sign Web App, providing users with a more efficient and organized experience throughout the lead engagement process.

Legal Management System (LMS)

Tools: React.js, TypeScript, Material UI, Redux, RTK Query

- Designed and developed the complete revamp of the Legal Management System, which manages collateral statuses and information linked to loan borrowers' accounts. This overhaul improved system navigation, reduced data retrieval time, leading to more efficient loan processing and legal documentation workflows.

Warehouse Monitoring System (WMS)

Tools: React, TypeScript, Redux, Axios, Material UI

- Designed and created a user management module that allows administrator to create, edit, and manage user roles within the warehouse monitoring system.
- Designed and implemented a reporting feature within the Warehouse Monitoring System which generates reports based on the Trans-In, Trans-Out and Inventory records of loan collaterals.

Funcars

Tools: WordPress, HTML, CSS, JAVASCRIPT, WORDPRESS, PHP, ACF, CF7

- Developed the Funcars website, an automotive platform displaying vehicle listings and related information through a modern, user-friendly, and seamless browsing experience.

Ruffree

Tools: WordPress, HTML, CSS, JAVASCRIPT, WORDPRESS, PHP, ACF, CF7

- Developed the official RUFFREE website, a wellness and relaxation brand offering services designed to promote rest and well-being. Focused on creating a clean design, intuitive navigation, and engaging service presentation.

Isuzu Philippines

Tools: WordPress, HTML, CSS, JAVASCRIPT, PHP

- Worked on developing the official Isuzu Philippines website using WordPress, focusing on a clean and responsive design, seamless navigation, and an engaging presentation of Isuzu vehicles, services, and automotive offerings.

Iyasheep

Tools: WordPress, HTML, CSS, JAVASCRIPT, WORDPRESS, PHP, CF7

- Developed the recruitment page for the Iyasheep official website, a Japanese dry head spa and relaxation business. The page focuses on clear job presentation, company information, and a user-friendly application flow for prospective therapists and staff.

Matasuke

Tools: WordPress, HTML, CSS, JAVASCRIPT, WORDPRESS, PHP, CF7

- Developed key sections of the Matasuke landing page, a housing-focused website promoting exterior wall tile solutions designed to reduce long-term home maintenance costs. Focused on improving layout flow, content readability, and presenting the benefits of the service clearly to potential homeowners.

Tender Nest Home Care Services

Tools: Figma, Affinity Designer, Canva, Adobe Illustrator

- Created a full website design for Tender Nest Home Care Services, a healthcare platform offering living and home support services. This improved brand accessibility, visual presentation, and user experience by incorporating a responsive layout, accessible color contrast, and streamlined information architecture, making it easier for users to find and understand available care options.

EDUCATION

Bachelor of Science in Computer Engineering | Polangui, Albay, Philippines | 2020 – 2024
