PROFESSIONAL SUMMARY

UI/UX Designer and Front-End Web Developer with **2 years of experience** in web design, front-end development, and enterprise application development. Skilled in user research, wireframing, prototyping, UI design, and translating designs into scalable, high-performance web interfaces.

TECHNICAL SKILLS

UI/UX Design: Wireframing, Mockup Creation, Prototyping, Design Systems, Component Libraries, Responsive Design, Low and High Fidelity Design

Front-End Development: React.js, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Material UI, Redux, RTK Query, Axios, REST API Integration

CMS & Tools: WordPress, Advanced Custom Fields (ACF), PHP (Fundamentals), Git, VS Code, Postman

Design Tools: Figma, Adobe Illustrator, Affinity Designer, Canva

WORK EXPERIENCE

Junior UI/UX Developer / Front-End Developer Asialink Finance Corporation

Dec 2024 – Present

- Created wireframes, mockups, user interfaces, and interactive prototypes using design software such as Figma, helping in explaining system functions and implementing project requirements through effective user interface designs.
- Conducted usability reviews and incorporated user feedback to improve system navigation, workflow efficiency, and overall user experience.
- Led the UI/UX redesign and front-end development of an internal Legal Management System, transforming complex accounting and finance processes into a streamlined, modern platform that enhanced user experience and operational efficiency.
- Designed and developed the **User Management** and **Reporting modules** for a **Warehouse Management System**, enabling role-based access control and automated warehouse report generation to improve operational efficiency and data accessibility.
- Collaborated closely with system administrators to troubleshoot and resolve user issues, ensuring smooth system operations and enhanced user satisfaction.
- Participated in system testing, bug resolution, and deployment activities to ensure application quality and successful project delivery.

WordPress Developer Mori Tech

Sept 2025

- Translated figma files into full functional websites created using Wordpress CMS, custom Wordpress PHP Templates, Advance Custom Fields templates for dynamic content generation, Contact Form7 plugin for contact forms and modern front-end technologies such as HTML, CSS and JAVASCRIPT.
- Optimized WordPress websites for search engines and performance, resulting in Google PageSpeed Insights scores averaging **97–100%** and improved overall site visibility.
- Collaborated with UI/UX designers during quality assurance testing to ensure website functionality, optimized performance, and accurate implementation of approved designs.

Graphic Artist

Sept 2025

Direct Funding Now

- Designed logos, banners, and email infographics for marketing strategy and lead generation, strengthening brand identity and enhancing the effectiveness of email campaigns.
- Updated and refined company visual assets, including logos and email banners, to ensure alignment with current brand identity and maintain consistency across digital materials.

Information Developer

Oct 2024 – Nov 2024

Asialink Finance Corporation

- Developed user manuals and system release notes, translating complex technical concepts into clear, user-friendly documentation and enhancing users' understanding of system products.

- Created user manuals include one for a in-house Financing and Account system, a re-engineered version of the company's existing Flicker System, and Payment Center Manager System, a system used for posting payments recorded from the above financing and account system.
- Assisted the designated QA Team member for system testing and system errors identification, improving the total usability of system products.

Web Developer Intern

June 2023 – Aug 2023

ERovoutika Electronics Robotics Automation

- Collaborated with the other UI/UX designer to create an interface design for the certificate generator web application for ERovoutika.
- Translated the UI/UX design for the Certificate Generator into live web application using HTML5, CSS3, JQUERY and JavaScript increasing the time in generating the certifications for the awardees.
- Handled the development of the "Bootstrap Tutorial" Web Page for the development of Erovoutika Tutorial Website enhancing user interaction

KEY PROJECTS

Tender Nest Home Care Services

Tools: Figma, Affinity Designer, Canva, Adobe Illustrator

- Created a full website design for Tender Nest Home Care Services, a healthcare platform offering living and home support services. This improved brand accessibility, visual presentation, and user experience by incorporating a responsive layout, accessible color contrast, and streamlined information architecture, making it easier for users to find and understand available care options.

Legal Management System

Tools: Figma, React.js, TypeScript, Material UI, Redux, RTK Query

- Designed and developed the complete revamp of a Legal Management System, which manages collateral statuses and information linked to loan borrowers' accounts. This overhaul improved system navigation, reduced data retrieval time, and enhanced the clarity of borrower-collateral relationships, leading to more efficient loan processing and legal documentation workflows.

Warehouse Monitoring System

Tools: React, TypeScript, Redux, Axios, Material UI

- Designed and created a user management module that allows an administrator to create, edit, and manage user roles within the warehouse monitoring system.
- Designed and implemented a reporting feature within the Warehouse Monitoring System which generates reports based on the Trans-In, Trans-Out and Inventory records of loan collaterals.

WordPress Websites

Tools: WordPress, ACF, CF7, PHP, HTML, CSS, JavaScript

- Delivered custom websites including, Isuzu Philippines, and other Japan-based companies, namely: Funcars, Ruffree, Smile Truck, Matasuke, and Iyasheep; using WordPress as the CMS, improving website SEO optimization, responsiveness, and overall user experience.
- Integrated dynamic content management through Advance Custom Field and Contact Form7, enabling easier content updates and streamlined inquiry handling for clients.

EDUCATION

Bachelor of Science in Computer Engineering | Polangui, Albay, Philippines | 2020 – 2024
